

East of England

The East of England is one of England's most important agricultural landscapes. Through LENs, funders co-fund actions that reduce carbon emissions, increase carbon sequestration, improve water quality, restore soils, create habitats, strengthen flood resilience and support resilient supply chains.

MRV providers

ADAS, Agricarbon

POPULAR MEASURES

- Integrate fertiliser and manure nutrient supply
- Use controlled release fertiliser
- Companion cropping
- Establish cover crops in the autumn -5+ species mix
- Planting new cross-slope hedges

Farmer innovations include:

- Using precision tools to target fertiliser accurately and efficiently
- Establishing agroforestry systems, including willow planting
- Using application technology, crop sensing and placement equipment to improve fertiliser accuracy

Landscape Enterprise Networks (LENs) brings organisations together to co-fund regenerative agriculture and nature-based solutions to drive landscape resilience. LENs supports healthier soils, improved water quality, increased biodiversity and lower greenhouse gas emissions.

We reduce risk for farmers, supporting them to make changes that are right for their farm.
