

## Leven

The Leven is one of Scotland's most agriculturally diverse areas, producing crops, livestock, poultry, eggs, flowers, and even Christmas trees. LENs aims to preserve and enhance the catchment's natural assets, making the landscape healthy and productive, while boosting biodiversity and mitigating climate change, as well as uplifting local communities. This project is supported by NatureScot in collaboration with The Scottish Government through [The Facility for Investment Ready Nature in Scotland \(FIRNS\)](#).

Landscape Enterprise Networks (LENs) brings organisations together to co-fund regenerative agriculture and nature-based solutions to drive landscape resilience. LENs supports healthier soils, improved water quality, increased biodiversity and lower greenhouse gas emissions.

We reduce risk for farmers, supporting them to make changes that are right for their farm.
