

Yorkshire

Yorkshire is one of England's key farming regions, with over 1m hectares of farmed land and a mix of arable and livestock production. Through LENs, funders co-fund actions that reduce carbon emissions, increase carbon sequestration, improve water quality, restore soils, create habitats, strengthen flood resilience and support resilient supply chains.

Landscape Enterprise Networks (LENs) brings organisations together to co-fund regenerative agriculture and nature-based solutions to drive landscape resilience. LENs supports healthier soils, improved water quality, increased biodiversity and lower greenhouse gas emissions.

We reduce risk for farmers, supporting them to make changes that are right for their farm.
